EVENT PROMOTIONAL MATERIALS

We also design custom branded uniforms, giveaways, display items to enhance your brand's presence at events and in the workplace. Our designs are tailored to reflect your brand identity effectively.

Examples here; a mouse mat and below the trestle cover for iba Oceania.

EXPO STALL DESIGNS

We design eye-catching expo stall elements like table panels, end graphics, and wall panels, as showcased in our work for 3ME. Our designs ensure your brand stands out and leaves a lasting impression.

iba

iba System

See the big picture
Get 360° Transparency with the iba system

The iba system for process data acquisition and analysis consists of perfectly adjusted hardware and software components for acquiring, recording, analyzing and processing measurement data.

Due to the modular design and the simple configuration, the iba system can be adapted comfortably to the various tasks and is scalable in size at any time.

BUSINESS BENEFITS

- Enhanced productivity
- Reduced plant downtimes
- Saved energy and raw materials
- Improved and documented product quality
- Prevention of critical plant conditions

SEE
See why ResMed is a global leader in the development, manufacturing, and marketing of innovative medical products for respiratory disorders.

DISCOVER
Discover the manufacturing process of life-saving medical devices that meet the worldwide demand. Witness firsthand the advanced automated manufacturing technology that enables ResMed to stay competitive and serve millions of customers worldwide.

LISTEN / HEAR
Listen to how ResMed's automated manufacturing technology aligns with their guided environmental policy, promoting waste and pollution reduction, the use of reduced impact materials, and fair labour practices globally.

This event promises valuable insights into ResMed's contributions to the healthcare industry and its commitment to sustainability and responsible manufacturing practices.

IICA TECHNICAL EVENTS

IICA **ACE** **coregas** **ABB**

Industry networking breakfast: opportunity to meet and get involved in a sustainable future

Date & Time: 6th May 7:30am for an 8am start to 10:30am finish

Venue: Strathfield Golf Club, 52 Werrisonga Road, Strathfield

Cost: For members \$40 for non \$80

coregas **Wodek Jakubik & Chandresh Wadhwana**
Innovations Manager
Business Development Manager
Hear from Wodek and Chandresh as they share with you the plans for Coregas to provide renewable gas for industry, domestic transport and energy storage.

ABB **Sean Stowe**
Head for E-Mobility Division, ABB Australia
Sean will present to you about sustainable transport and the future of smart mobility.

ACE **Greg McCarvie**
Director of ACE EV
Greg will focus on his project to roll out EVs through his collaboration with local governments and his launch of EMIKA (Electric Mobility Manufacturer Australia) and with its prime objective to encourage EV manufacturing in Australia, working toward a zero emission future.

AMPCONTROL

AMPCONTROL FACILITIES WELSHPOOL TOUR

Ampcontrol is a leading provider of integrated electrical and electronic technology equipment with a focus on specialist Power & Automation projects across the resourcing, infrastructure, and renewables sectors.

If you're interested in learning more about this innovative company, be sure to join us on Thursday, July 20th, for an exclusive tour of Ampcontrol Facilities Welshepool.

During the event, you will get to see some of the Stand Alone Power System solutions that the Renewables division of Ampcontrol have been working on and also chat to some of the Team about this division along with the other divisions of Ampcontrol across the country.

The tour will include an overview of the Welshepool Capabilities and a Q&A session afterwards where you can learn more about the innovative solutions and ask any questions you may have.

You'll also have an opportunity to network with like-minded professionals while enjoying food and drinks, making it the perfect opportunity to connect with others and stay up to date with the latest industry trends.

Thursday, 20th July, 2023
6:00 pm - 8:00 pm

41a Kewdale Road Welshepool 6106 AUSTRALIA

Sydney WATER

SYDNEY TECHNICAL TOUR OF NORTH HEAD WATER RESOURCE RECOVERY FACILITY

In collaboration with Sydney Water, the IICA invites you to join us for a visit to the North Head Water Treatment Plant and venture within the tunnel for a full exclusive tour of the operations of this plant.

Followed by opportunity to network and Q&A session.

Friday, 8th September
7:30 AM - 9:30 AM

North Head Wastewater Treatment Plant, 2 Bluefish Dr, Manly, NSW 2095

Members complimentary
Non members \$25 pp
Please register early to guarantee your place. Places are limited.

The North Head Water Resource Recovery Facility is one of 28 water resource recovery facilities in Greater Sydney. It is where the water is treated to a primary standard before releasing it to the ocean via a desalination seawall which includes continuous monitoring and regular tests done to check for any impact on the marine environment.

Discover how the plant's effluent recycles 1.8m litres of drinking water a day by using recycled water for purposes such as cooling, odour treatment and washing filters. How they have worked to improve water quality in Sydney Harbour, in the North Head Storage Tunnel, which starts 40m below sea level west of the river Lane Cove and ends 100m below sea level at the sea wall at North Head STP.

You will learn about the plant's innovative hydro-electric generator and a co-generation plant, which uses methane gas generated during the production of biosolids. Up to 63% of the electricity used at the plant can be saved each day through these processes.

See all the process units of one of the largest primary treatment plants in the world. Processes like screening, degritting, large above ground digesters, biosolids dewatering and out loading, both chemical and bacterial odour scrubbing, as well as excess gas burners.

And finally, the plant's hybrid SCADA (Siemens SP-400 based PLC/Schneider ClearSCADA interface) will be discussed by the host as well as the suitability of using sophisticated communications in a corrosive atmosphere.

ISO

Schneider Electric **HYUNDAI**

PRESENTS:

THE FUTURE OF MOBILITY WITH HYUNDAI & SCHNEIDER ELECTRIC

Thursday, May 11, 2023
6:00 PM

SCHNEIDER ELECTRIC
2 BANKFIELD RD, MACQUARIE PARK NSW 2113

ABOUT THE EVENT

"The new energy landscape is spreading rapidly, driven by increased investments in the low-carbon transition, particularly in renewables and electric transport. Energy is becoming a key aspect of business strategy as rising power costs and unreliable grids may impact business results and sustainability.

The event will feature a presentation by Darryl Thornton, General Manager for Hyundai Commercial Vehicles Australia. Darryl will be focusing on Commercial EVs and discussing Hyundai's unified vision for the future of the Australian market.

He will be sharing his expertise on what lies ahead, both for the immediate future and beyond, giving attendees a unique opportunity to gain insights into the future of mobility.

To follow discover how Schneider Electric can help you meet today's challenges, become more energy independent and future-proof your facilities and business with Microgrid, eMobility solutions combined with cloud solutions for EV charging networks enabling the next generation of Australia's electrification.

PRE-REGISTRATIONS ONLY

COURSE PROMOTIONAL MATERIAL

We design professional course promotional materials, including certificates that highlight achievements and enhance your educational offerings. Our materials are tailored to make a lasting impression.

Course Costs (ex GST):

Certified PROFIBUS Installer Course:

Member \$1,050

Non-member \$1,250

PROFIBUS Troubleshooting and Maintenance:

Member \$1,850

Non-member \$2,500

LIMITED PLACES ARE AVAILABLE & IS BOOKING UP FAST! PLEASE EMAIL MARKETING@PROFIBUS.ORG.AU WITH YOUR PREFERRED DATES & NUMBER OF STUDENTS.

Join us for an immersive learning experience in Western Australia. PAANZ is flying in an expert trainer to conduct face-to-face courses at Phoenix Contact locations across Australia.

Perth dates: 14 - 23 August

Brisbane dates: 25 - 29 August

Sydney dates: 30 August - 04 September

Courses Offered:

Certified PROFIBUS Installers (1 day)
PROFIBUS Troubleshooting

Maintenance (2 days, including Installer Course)

FILLABLE FORMS

We create custom fillable forms, such as those designed for coordinating Protocol training for FMGL. Our forms streamline processes and ensure efficient data collection.

**Fortescue** **IGNITE YOUR SKILLS WITH EXCLUSIVE FACE-TO-FACE TRAINING!**

☐ **1 day Certified Installer course**

Physical attendance will be required at one of the Exam Venue Locations. Please ensure you tick your state location in that section below.

Course Fees
Members: \$900 Ex-GST Non Members: \$1,150 Ex-GST
Course Dates: to be advised however, please tick your month preference for this course and we will be in touch shortly, thank you

☒ March ☐ April ☐ May ☐ June ☐ July (indicate location)
☐ Aug ☐ Sept ☐ Oct ☐ Nov ☐ East Coast ☐ West coast

☐ **2 day Certified Installer and Commissioning & Maintenance course**

Physical attendance will be required at one of the Exam Venue Locations. Please ensure you tick your state location in that section below.

Course Fees
Members: \$1,650 Ex-GST Non Members: \$2,300 Ex-GST
Course Dates: Kick off date below but more dates to come please tick your preferred month

☐ March ☐ April ☐ May ☐ June ☐ July (indicate location)
☐ Aug ☐ Sept ☐ Oct ☐ Nov ☐ East Coast ☐ West coast

Profibus Certified System Design
This 1 day course is aimed at anyone who is dealing with the design, specification or procurement of modern automation and control systems at the engineering or technical level. The course is also suitable for device manufacturers, system integrators and technical sales/marketing people who want to know the best way to put systems together.

Profibus Certified Engine
The Certified PROFINET Engineer course is an in-depth 3 day course that is suitable for a wide range of engineers working in a wide variety of industries. The course is suitable for anyone who is working at a technical level in automation and control systems.
