

# DESIGN FOR *DIGITAL &* *PRINT*

# NEWS LETTERS

We craft newsletters for companies like *Ti2* and the *PROFIBUS* Association, delivering key industry updates and insights. Our content ensures your audience stays informed and engaged.

# EVENT MATERIALS

We design impactful event materials for associations & corporates like IICA, Ampcontrol, PAANZ, and Sydney Water. From tech event flyers to promotional content, our creations ensure your events stand out and resonate with your audience.

**SYDNEY TECHNICAL TOUR OF NORTH HEAD WATER RESOURCE RECOVERY FACILITY**

The North Head Water Resource Recovery Facility is one of 29 water resource recovery facilities in Greater Sydney. It is where the water is treated to a primary standard before releasing it to the ocean via a deepwater ocean outfall which includes continuous monitoring and regular tests done to check for any impact on the marine environment.

Discover how the plant's efficiencies save 1.8m litres of drinking water a day by using recycled water for purposes such as cooling, odour treatment and washing filters. How they have worked to improve water quality in Sydney Harbour. In the Northside Storage Tunnel, which starts 40m below sea level west of the river Lane Cove and ends 100m below sea level at the wet well at North Head STP.

You will learn about the plant's innovative hydro-electric generator and a co-generation plant, which uses methane gas generated during the production of biosolids. Up to 63% of the electricity used at the plant can be saved each day through these processes.

See all the process units of one of the largest primary treatment plants in the world. Processes like screening, dewatering, large above ground digesters, biosolids dewatering and out loading, both chemical and bacterial odour scrubbing, as well as excess gas burners.

And finally, the plant's hybrid SCADA (Siemens S7-400 based PLC/Schneider ClearSCADA interface) will be discussed by the host as well as the suitability of using sophisticated communications in a corrosive atmosphere.

In collaboration with Sydney Water, the IICA invites you to join us for a visit to the North Head Water Treatment Plant and venture within the tunnel for a full exclusive tour of the operations of this plant.

Followed by opportunity to network and Q&A session.

**Friday, 8th September**  
**7:30 AM - 9:30 AM**  
 North Head Wastewater Treatment Plant,  
 2 Bluefish Dr,  
 Manly, NSW 2095

Members complimentary  
 Non members \$25 pp  
 Please register early to guarantee your place. Places are limited.

**RESMED FACILITY TOUR: DISCOVERING INNOVATION IN RESPIRATORY HEALTHCARE**

**RESMED, 1 ELIZABETH MACARTHUR DRIVE, BELLA VISTA, NSW 2153**

**19 OCTOBER 2023**  
**8:30AM - 10:30AM**

**REGISTER NOW**

**SEE**  
 SEE why ResMed is a global leader in the development, manufacturing, and marketing of innovative medical products for respiratory disorders.

**DISCOVER**  
 DISCOVER the manufacturing process of life-saving medical devices that meet the worldwide demand. Witness firsthand the advanced automated manufacturing technology that enables ResMed to stay competitive and serve millions of customers worldwide.

**LISTEN / HEAR**  
 LISTEN to how ResMed's automated manufacturing technology aligns with their guided environmental policy, promoting waste and pollution reduction, the use of reduced-impact materials, and fair labour practices globally.

This event promises valuable insights into ResMed's contributions to the healthcare industry and its commitment to sustainability and responsible manufacturing practices.

**IICA TECHNICAL EVENTS**

**AMPCONTROL FACILITIES WELSHPOOL TOUR**

Ampcontrol is a leading provider of integrated electrical and electronic technology equipment with a focus on specialist Power & Automation projects across the resourcing, infrastructure, and renewables sectors.

If you're interested in learning more about this innovative company, be sure to join us on Thursday, July 20th, for an exclusive tour of Ampcontrol Facilities Welshpool.

During the event, you will get to see some of the Stand Alone Power System solutions that this Renewables division of Ampcontrol have been working on and also chat to some of the Team about this division along with the other divisions of Ampcontrol across the country.

The tour will include an overview of the Welshpool Capabilities and a Q&A session afterwards where you can learn more about the innovative solutions and ask any questions you may have.

You'll also have an opportunity to network with like-minded professionals while enjoying food and drinks, making it the perfect opportunity to connect with others and stay up to date with the latest industry trends.

**Thursday, 20th July, 2023**  
 6:00 pm - 8:00 pm

**41a Kewdale Road Welshpool 6106 AUSTRALIA**

**INTERNATIONAL ORGANIZATION OF STANDARDIZATION**

**ISO: TC199 SAFETY OF MACHINERY**

Newly Revised Machinery safety standards and their applications

# iba System

See the big picture  
Get 360° Transparency with the iba system

The iba system for process data acquisition and analysis consists of perfectly adjusted hardware and software components for acquiring, recording, analyzing and processing measurement data.

Due to the modular design and the simple configuration, the iba system can be adapted comfortably to the various tasks and is scalable in size at any time.

## BUSINESS BENEFITS

- Enhanced productivity
- Reduced plant downtimes
- Saved energy and raw materials
- Improved and documented product quality
- Prevention of critical plant conditions

**[Ti²] FEATURED PRODUCTS**

- Softing Profibus Tester PB-TS**

The PROFIBUS Tester 2 (PB-TS) is a powerful diagnostic and troubleshooting tool for testing the cables, checking the signals and analyzing the communication of PROFIBUS networks.

It is history-oriented and provides a graphical display allowing for quick results when working in identification mode. Additionally, the PROFIBUS PA network can be analyzed. In addition, the PROFIBUS Tester 2 supports the export of test results for advanced analysis.
- Softing pnGATE PA/PB**

With pnGATE PA, it is possible to integrate up to 2 PROFIBUS PA segments and 1 PROFIBUS DP segment into INCHISEP systems using virtual mapping.

With pnGATE PB, engineering tools can be reduced by using existing power connections in technology upgrade projects. It offers 50 redundancy and enables configuration, parameterization, and plant asset management using standard industry tools. The device supports major PROFINET engineering tools such as TIA Portal, Step7, and PC Configuration, allowing its use in FQEDM trace applications.
- Softing mobilLink**

mobilLink is a mobile and a USB interface for HART FOUNDATION Profibus and PROFINET PA. The Bluetooth and battery operation enables it to be used with handheld PDA devices such as tablets and smartphones.

mobilLink can be used in a variety of applications where it is compatible with PDI Frame applications and other major engineering tools. Additionally, it is tested for harsh environment (approved by IEC60068 and IEC 60721).

**Softing dataFEED OPC Suite**

dataFEED OPC Suite is a powerful diagnostic and troubleshooting tool for testing the cables, checking the signals and analyzing the communication of PROFIBUS networks.

It is history-oriented and provides a graphical display allowing for quick results when working in identification mode. Additionally, the PROFIBUS PA network can be analyzed. In addition, the PROFIBUS Tester 2 supports the export of test results for advanced analysis.

We support all other modern industrial Protocols and Standards, including Modbus, EtherNet/IP, EtherCAT, OPC, MQTT, and IEC61131. We are the official Channel Partner for CODESYS in Australia.
